*General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

*General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

NOTE: Hereafter notification of all revisions found subsequent to the release of a previous month's report will be supplied on the pages immediately following the current month's report under the following heading—

*General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

*General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

*General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

*General imports of merchandise include the following types of transactions;

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

*General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

*General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

* General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

*General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the grose weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

eneral imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

NOTE: NT - No Transactions

*General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

NOTE: NT - No Transactions

*General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

NOTE: NT - No Transactions

*General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

NOTE: NT - No Transactions

*General imports of merchandise include the following types of transactions:

a. Immediate consumption entries
   (1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.
   (2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

b. Warehouse entries
   (1) Commodities entered into bonded customs warehouses for storage.
   (2) Imported ores and crude metals such as copper, lead, and zinc entered into warehouses bonded for smelting and refining are included with warehouse entries.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.
